About ThermoSecure Ltd

Selecting a new garage door to enhance and complement your home has never been easier. Our range of aluminium roller garage doors are designed to provide long-lasting durability, security and insulation.

Roller garage doors have grown in popularity as they offer homeowners a wide variety of choice, are easy to operate and include an extensive range of benefits.

Our products provide unrivalled thermal and acoustic insulation and are manufactured with a C.F.C free foam-filled double aluminium enclosure. To match the style of your home they can be painted to any RAL colour or laminated in a wide range of colours.

Our discreet and compact garage door range creates more space within your garage as they roll up vertically.

We have a network of specialist garage door companies who provide expert advice, they supply and install our products and are there when you need them.

All our doors come CE. Marked to fully comply with European directives.

Two Distinctive Products

Our roller garage doors are manufactured in the United Kingdom with a polyurethane foam core and durable double skin aluminium enclosure. They provide exceptional security features and enhance both thermal and acoustic insulation.

Our products rise vertically and are ideal for all homes, including properties with short driveways or where space is limited. Our garage doors are remotely operated, alarmed to provide peace of mind and can be integrated with your smart home technology.

ThermoSecure 78

The 78 Range is a simple and a proven door design. It has been specifically designed to provide enhanced security and optimum wind deflection. The 78mm tall slats are manufactured from durable aluminium and are ideal for garages that require a larger garage door.

ThermoSecure 55

Our slimmest and most compact garage door has been designed for homes with minimal space. The 55 range uses smaller aluminium slats that are 55mm tall, this allows the garage door to roll into a compact space that requires less space at the top of the door.

Our range of roller garage doors have modern operator technology, this means they can be opened or closed with a push of a button. This provides convenience and comfort when operating your garage door. In addition to our remote control system, we offer integration with your smart home technology.

To provide peace of mind, our garage doors are installed with a built-in safety edge sensor that will stop and reverse when an obstruction is met.

In the case of a power failure, our garage doors come with a manual override as standard. An optional battery back-up device can be purchased.

We can also provide an external manual release which allows you to manually operate your garage door from the exterior of your building.

Create More Space

Roller garage doors provide a simple and effective solution for driveways and garages that have limited space.

Our space-saving roller garage doors are the perfect solution for anyone with a small driveway or garage. Unlike traditional garage doors that swing into your garage, roller garage doors offer a discreet design and open vertically. Our system allows you to park your car tight against the garage door and easily open and close it without the need to move your car.

The door curtain rolls efficiently above the opening without the door or tracks projecting inside your garage, this provides more storage space within the garage.

Our 55 Range is an extremely compact garage door that maximises space within your garage. Our garage doors can be fully customised and are manufactured within the United Kingdom.

78 Range - Laminated Golden Oak Woodgrain

Laminate Finishes - RENOLIT EXOFOL highperformance films for exterior applications have an outstanding reputation as the market leader for many years. Their multi-layered structure protects and decorates plastic and metal building elements and are ideal for garage doors. We can supply a range of solid colours or woodgrain effect.

Please note: All laminated finishes are laminated on white lath unless otherwise specified.

A choice of special colours designed to match your windows and doors

Coloured garage doors can help present your home in its best possible light, adding to that all important kerbside appeal. We offer a beautiful range of colours and natural woodgrain finishes so there's a perfect colour to suit every individual home.

With homeowners wanting to co-ordinate their garage door with entrance doors, windows and other architectural features, we can offer a bespoke colour match service which gives you the freedom to choose any colour.

Our painted and laminated roller garage doors are durable and scratch resistant, they offer high performance and longevity in all types of weather conditions including bright sunlight and high rainfall.

Specialised Painting Process

Alongside stocking a wide range of RAL and BS colours including wood effect paint and laminates, our special painting process allows us to match any colour. Special colours are provided on slightly longer lead times.

Colour Combinations

Our wide range of colours and finishes are designed to complement your home whilst providing a protective layer. All colours and finishes require minimal maintenance and ensure your roller garage door looks good for years to come.

Interior Door Curtain

The door interior is finished to match the exterior on painted doors. For laminated and wood effect finishes you can choose between White or Dark Brown (RAL 8019)

The Door Guides

The door guides are colour matched to the painted finish of the door curtain. For laminated and wood effect finishes they can be painted in a choice of White or Dark Brown (RAL 8019)

Half Box (90 degree)

The half box is colour matched to the painted finish of the door curtain. For laminated and wood effect finishes they can be painted in a choice of White or Dark Brown (RAL 8019)

Full Box Option

The full box is colour matched to the painted finish of the door curtain. For laminated and wood effect finishes they can be painted in a choice of White or Dark Brown (RAL 8019)

End Plates

The end plates are colour matched to the painted finish of the door curtain. For laminated and wood effect finishes they can be painted in a choice of White or Dark Brown (RAL 8019)

Please Note: As your garage door is manufactured from multiple materials, we always try to guarantee an exact colour and texture match, however this is not always possible. Colours shown are for guide purposes only. Over time, your garage door may show slight scuff marks and scratches Please ask to see a colour sample before confirming your choice.

Insulated garage doors will reduce noise creating a peaceful home

Our range of insulated aluminium garage doors provide enhanced security, improved thermal insulation and will substantially reduce noise entering your home.

The 78 Range is manufactured with a 18mm thick, filled with a C.F.C free foam designed to provide increased insulation and enhanced acoustic performance. The foam core is designed to reduce heat loss whilst preventing noise from vehicles entering your home.

Our doors are made to measure, so there's no compromise on weather protection, acoustic and thermal insulation.

Create a Quite Home Office

Preventing noise from entering your garage will allow you to turn your garage into a usable space.

Many homeowners want to transform their home and creating more space in their garage is the perfect place to start.

Aluminium roller garage doors create more space within your garage

Our system allows you to park your car tight against the garage door and easily open and close it without the need to move your car.

Our range of garage doors will protect your home from the weather whilst preventing cold draughts.

The CFC free polyurethane foam core and the durable aluminium enclosure are designed to provide high-performance weather sealing and optimum wind deflection.

Our garage doors feature a nylon brush strip that is installed onto both sides of the door guides, these insulating strips can help protect your home against the outside elements.

Installed to the bottom of your garage door is a durable rubber seal that helps to keep dust and debris from entering your garage.

Enhanced Security

Manufactured from durable aluminium and with a reinforced bottom rail, overlapping design and automatic locking as standard you need never worry about forgetting to lock your garage door ever again.

Our range of garage doors are robust and provide security features that give enhanced protection for your car and home.

Our secure roller garage doors can help prevent unauthorised access to your property, and they don't give intruders leverage or an exact point of entry.

The door gains strength through the robust double-skinned insulated aluminium profile that interlocks to form a physical security barrier.

To provide peace of mind, each garage door is installed with an audible alarm as standard.

Garage Door Features

Our aluminium roller garage doors provide enhanced acoustic and thermal insulation whilst increasing the security of your garage. They are designed to improve your home aesthetic and to allow you to operate your garage door with a push of a button.

As our garage doors are alarmed as standard, if an attempt is made to lift your door from the bottom, an audible alarm is triggered to deter intruders.

1. Enhanced Security

Deprat barrels and locking rings are designed to give increased security to the garage door (Only available on 78 product range)

2. Audible Alarm

An audible alarm sounds at approximately 90dB alerting anyone in the vicinity

3. Aluminium Guides

The aluminium guides are colour matched for all painted doors

Durable and Secure...

The garage door curtain is manufactured with a foam-filled aluminium enclosure, it provides optimum acoustic and thermal insulation whilst increasing rigidity and security.

4. Full Box

A full box cover is supplied as standard on all 55 Range doors and comes as an option on the 78 Range

5. Internal Override

In the event of a power failure, all doors are supplied with an internal crank handle allowing you to operate the garage door manually

6. Nylon Brush Strip

The nylon brush strips provides a smooth and quiet operating door, they help to keep the elements at bay

7. Safety Brake

A safety brake is fitted to 78 Range, this provides added safety

8. Rubber Weather Seal

The bottom rubber weather seal helps to prevent dirt and debris entering your garage

External Manual Override

A low-level crank handle to operate your garage door. Only required when there are no other means of entry into the garage

For Greater Comfort, **Motorise your Garage Door**

Somfy's market leading Rollixo RTS control is considered to be the best in the industry for many reasons.

It provides a wide range of benefits for your home that will help you feel more secure and in control. With the Rollixo RTS, you can easily manage your garage door and other connected devices with ease. It offers a high level of security with its encrypted communication protocol, ensuring that your home is always safe.

Simple operation where safety comes as standard...

Combined with a proven wireless safety edge system to detect obstacles and an array of safety, security and comfort accessories, the Somfy motor and Rollixo RTS control combination is a complete and compliant system.

The compact Somfy handset makes coming home every day completely hassle free. This four channel remote control lets you automatically operate your garage doors from the comfort of your car, so you'll never have to endure the cold, wind and rain again.

The firm metal ring also means you can connect the Keygo to your keys, so you never have to worry about misplacing it.

State of the art Safe **Edge Control System**

Sommer are a World leading manufacturer of door automation who we are proud to be a partner with. We include two of their safe edge control systems, Hardwired and Wireless. The difference being how the detection of the door activity is made.

Wired Safe Edge Control System

The hardwired system sends signals via a "curly cable" that is connected to the garage door and control unit.

Wireless Safe Edge Control System

This modern wireless system sends signals remotely using battery powered receiver technology.

Remote Control Handsets - Two Pearl 2-channel handset remotes are provided with each garage door, additional remotes can be purchased at any time.

Pearl 2-Channel Handset Pearl 4-Channel Handset*

to provide shaded sun protection

A retractable garden awning will make a great addition to your home, they allow you to create a shaded area or can provide shelter from the rain. Our automatic garden awnings are developed by using the latest technology, they are remote controlled and can be operated via your smart speaker or phone app. Manufactured from a durable metallic enclosure, there are no plastic elements to compromise their modern aesthetic.

Our garden awnings are bespoke and made to measure which ensures a perfect fit for your outside space. They are available in a wide range of fabrics and colours, when not in use they retract in to a slimline enclosure.

Powered by Somfy, every garden awning is supplied with its own remote controlled handset, a one touch control allows you to open and close your garden awning with ease.

Integrated Smart LED Lighting

Garden awnings can be installed with LED light strips that can be controlled via a remote control, app or your smart speaker.

The high quality LED lights offer exceptional lighting and allow you to enjoy your garden in the evening.

Range of Colours

Simple and effective, our fabrics are treated to withstand UK weather conditions and are designed to provide a modern home aesthetic. Our automatic garden awnings will shelter you from the rain and shade you from the sun allowing you to make the most of your outside area.

With a huge selection of fabrics & designs, our range of garden awnings can be customised to match your home aesthetic.

Compatible With:

Our retractable grilles are the perfect choice for quality and convenience no matter whether you are looking to improve security at the home or the office. They are manufactured to meet your unique security requirements and are manufactured from high quality steel, they can be powder coated in over 200 RAL colours. The retractable grilles securely lock into place for times when additional security is deemed necessary, when not in use, you can simply draw them back where they are discreet and unobtrusive.

Our range of security grilles meets today's modern demands for aesthetics, reliability, and safety. Our retractable grilles are easy to operate and virtually maintenance free. All grilles are made to order and ideal for both domestic and commercial applications.

Window and Door Shutters

Window and door shutters are becoming ever more popular additions to homes as they provide enhanced home security.

Manufactured from durable aluminium, window and door shutters are designed to protect your home and valuable processions.

Aluminium shutters are suitable for a wide range of applications and are manufactured to your exact size specification. They are quieter in operation than traditional steel shutters and their slimline profile is ideal where headroom is limited.

Roller shutters are electrically operated and are available in a wide range of colours.

Insulated Aluminium

A double skinned aluminium enclosure with a polyurethane foam core improves U-values and sound proofing. Insulated window and door shutters can help minimise heat loss whilst keeping your home safe.

Extruded Aluminium

To provide enhanced security, our range of extruded aluminium slats are designed to provide exceptional strength and a high quality finish.

Our Trusted Supply Partners:

Our roller garage doors reduce heat loss, block noise and enhance your home security.
